Experience

Full Stack Web Developer Intern   Aug 2022 - Nov 2022
Code Academy - Gaza Sky Geeks   *Gaza, Palestine*

- Developed over 7 projects as a full stack web developer, using Nodejs, Express, React, Sequelize, Postgres SQL, Web APIs, and test-driven development.
- collaborated with teams on different projects; every team member had their role in the project.
- Improved problem-solving skills and communication, and leadership skills.

projects:

• G-lancer: a platform that combines clients with freelancers that offers various tools and services that make it easier for freelancers to find work and find the talent needed to manage projects for clients.

- Participated in analyzing the system and database schema.
- Established socket server for live notifications using socket.io
- Programmed back-end APIs for editing, adding, and deleting.
- Built front-end pages using React.js and MUI components.
- Created comprehensive testing to ensure bug-free code.

• WUDO: E-commerce website that sells furniture online.

- Directed the team and organized the tasks among team members.
- Built back-end APIs for adding, editing, and deleting from a cart.
- Developed cart and product pages using React.js and Designed them using Figma.
